

## **Ranger Red's Zoo & Conservation Park is seeking to appoint a Head of Charity for our Ranger Red Shed.**

**About us:** We are a small privately owned boutique Zoo currently located in Pinjarra, that operates under licence from DBCA & DPIRD.

We are actively working with other institutions to assist in new state & federal government regulations and acts relating to bio security and tourism. This is currently being revised to ensure they are fit for purpose and protect the industrie/business.

The majority of our visitors are local, though we also consider tourism and its benefits to the state as a major part of our role. We are a small and young team but are passionate about conservation and education of the public about wildlife and the environment affecting them. We also run a mobile Zoo2U program, which takes our message out to the public including schools, local shows and many more.

We educate the public about many forms of wildlife including venomous animals (mainly snakes) and offer relocation training both on and off site.

Going forward, especially with our charitable organisation, we are looking to start work & construction on our new Zoo at its new location 20 minutes from our current Zoo. We are looking at the conversion of our off site facility close to the new Zoo to house and operate our Conservation projects.

**Requirements of the role:** Marketing background and knowledge of the intricacies of both Zoo and conservation environments and industry would be desirable/vital. Knowledge of charity work and reporting requirements to the relevant government bodies is required. You would be working alongside our director, who would expect your professional input to development strategies. Salary would depend on previous experience. The position would be for a 1 year contract initially with a potential of extension. The current project expectation is 3 years.
